

CHAKRA BALANCER \$770.00

This product features 'eight sided twin domed plates' (90cm in diameter) treated and fused together to work in perfect synergy and produce, its own unique energy.

This product is designed and recommended for use by practitioners only, who are skilled in energy work.

The Chakra Balancer is one of three items in the Practitioner range and has many uses such as clearing unwanted energies and re-energising the blood flow, as well as balancing the chakras. The energy generated from this product allows energy to flow into areas where it is most needed. Many report the different effects they feel when using the Chakra Balancer. **(P.S. The plate is not claimed as a therapeutic product).**

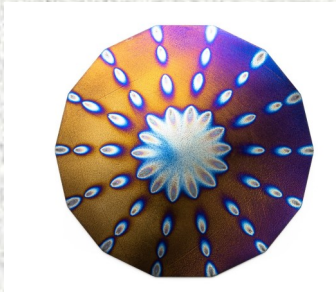

Chakras play an important role in well-being and health and are an important part of our bio-energy system. When functioning effectively, they are constantly spinning, bringing energy to the physical body and all its energy layers. The main chakras are located on the spinal column, the head, and in the heart plexus but there are many more located throughout the body.

You will find many good websites to help understand more about chakras and their functions.

The Chakra Balancer is coloured individually by hand and therefore no two items will be the same and no colour requests can be accepted. It is sold with a long wax coated cotton cord and comes with useful instructions.

LARGE 14 SIDED PLATE \$620.00 (1 acre radius)

Tesla's Large 14 Sided Plate is ideal for harmonising WiFi in the home and also underground water and ley line activities.

We are now finding that the 14 sided House Plate is not sufficient to cover homes in cities and suburbs due to the increase in communications introduced for modern technologies.

Large 14 Sided Plate is used in areas of mobile phone towers, WiFi in the home, high voltage power lines or electric trains and trams close by.

We at Energy Health & Harmony very rarely sell these House Plates for EMR now, due to the ever increasing frequency interference with our

body. The Small Oyster Plate is by far, more effective for this situation. 140mm x 1.5mm thick.

The proprietary frequency matrix in this unit is specifically configured to help alleviate some of the energetic effects caused by geopathic stress.

This plate may also be used to energise reflex points and the auric field.

COMPUTER PLATE \$155.00 (Field of influence approx 1 metre)

Designed specifically for computer screens and other uses such as Smart Meters. We have found by placing a Computer Plate on top of the meter together with an Electron Stabiliser attached to an electrical cord in the house/garage that there is a considerable change felt by those sensitive this frequency activity.

70mm x 70mm x 1.0mm thick. After the vibrational signature of the metal has been varied, it acts as a transceiver of specific photons (light energy).

This product is then able to help negate some of the adverse biological effects of man-made EMFs associated with computer screens.

Reported benefits: eye-strain relief from computer screen; improve taste of water; stress relief from wifi or other gaming devices; may assist with pain relief.

PRACTITIONER'S PLATE \$350.00

The size of this plate makes it ideal to work fast and at a distance - usually placed under the massage/work table. Your clients will exhibit alpha brain patterns quickly, thus enhancing your work.

Large Oval 90mm x1.0mm thick

TABLET AND LAPTOP TAGS \$230.00

The set consists of: **Set of Four Tags**

- **Size 15mm diameter each**
- **Thickness 1mm each**
- **Colour Silver**

After much research and testing a Tablet and Laptop Tag Set (TLTS) has been developed for tablets and laptops. This new tag set is a very powerful answer to the many devices that are generating Electro Magnetic Frequencies (EMF). These EMFs have been found to cause damage to the DNA as a result of heat shock proteins being generated. Electromagnetic radiation and microwave fields emanating from the wifi and bluetooth antennas is suggested through studies to cause bio-energy effect to the DNA when they are in use.

The set are positioned one in each corner of the tablet or laptop, and spreads its energy equally on both sides - both the upper and lower body from where the device is held.

At present, there is NO other use for these tags and definitely NOT for use on mobile/cell or cordless phones. As mentioned they are designed differently and not sufficiently effective for use on phones.

This set of four Laptop-Tablet Tag Set will continue to be effective from here on and transferred from device to device as you buy new.

The set of 4 Tags comes with instructions and double sided tape ready to fit easily.

The set of four (4) Tags are necessary for one device.

PHONE TAGS \$140.00 Two phone tags per set.

Tesla Phone Tags have been developed for mobile phones, cordless telephones and bluetooth devices.

When positioning the Phone Tag on any device, place a straight edge of the phone tag parallel to the top or bottom edge of the phone or tablet.

The Phone Tag alters the chaotic pattern in the transmissions to and from the antenna of the phone. It renders the mobile phone biologically harmonious to the user and anyone nearby. If you are using a device that has both wireless and bluetooth (all modern mobile phones) **two phone tags will be required.**

HOW DANGEROUS ARE MOBILE PHONES ?

Dr. Neil Cherry, Ph.D. biophysicist, warns that headaches, fatigue, lethargy, nausea, dizziness, depression, arteriosclerosis and possibly Alzheimers may result from frequent or prolonged calls on mobile phones. "The risk is extremely high," Dr Cherry says, "Because cancer takes decades to develop, it will be another 10 or 20 years before 'mobiles' manifest a big bonanza in brain tumours".

To our knowledge at the point of writing, there is no other device available which does the job that the Tesla's phone tag does, and that has an indefinite life of effectiveness.
