

## 5G Small Oyster Plate - Star Blue \$620.00

(P.S. Colours may vary)

Two specially produced fourteen sided plates, this plate influences an area of about  $\frac{3}{4}$  of a hectare (1 $\frac{1}{4}$  acres).

The 5G Small Oyster Plate is used in single/double level homes and apartments.

In multi story buildings/offices it will cover 12 floors (6 above and 6 below the positioned plate).

The 5G Small Oyster Plate produces a specific energy which alters the frequencies from mobile phone towers, satellites, wifi, radar and high voltage power lines, rendering them biologically compatible. In the process of doing this, plant and animal life are also energised.

In both home and work environments, people find they are calmer and less stressed when their home or office has been treated with a 5G Oyster Plate and an Electron Stabiliser.

## 5G Large Oyster \$1,131.50

This particular configuration is made specifically for large properties. The energy **covers 30+ acres** and helps counteract the effects of geopathic stress. Some farmers have reported growing larger healthier plants with less watering.

The Large Oyster Plate is one of four Tesla Oyster plates. Oyster plates are special as they consist of twin plates treated at the same time in our Tesla factory and fused together to work in perfect synergy.

These plates are the largest oyster plates available.

Design requests are not available for these plates.

Each design is a unique work of art and done by hand.

Your Large Oyster Plate design is allocated by the magic of the universe. Design shown is purely for illustration purposes.
