

POCKET PLATE \$115.00 65mm x 1.0mm thick.

Designed to be placed in a shirt pocket, this handy and versatile plate is able to negate some of the adverse biological effects of man-made EMFs and work in other areas for you also. This has been made possible by the vibrational signature of the titanium metal having been varied so that it acts as a transceiver of specific photons or light energy.

his little plate has been suggested to have helped with:

- Altering the nasty taste of water to very pleasant
- Altering a cheap wine to smooth and pleasant
- Speeding the healing process and relieving minor pain
- Sweetening fruits
-

Unlike the Personal Pendant, it is not possible for design requests, but it is okay to request general blue or gold tonings in the “comments” box and we will endeavour to accommodate that request if in stock at the time.

Field of influence approximately 1 metre.
